

adaptiQ® Sterile Injection Vials

SCHOTT ISO standard sterile and depyrogenated, ready-to-use vials, supplied in a choice of three packaging formats

SCHOTT adaptiQ® Vials in Cup Nest

SCHOTT Injection Vials supplied sterile nestled in cups within a plastic preform, inside an industry standard tub. Cup Nest packaging offers simple de-nesting and re-nesting and is also ideal for automated processing.

SCHOTT adaptiQ® Vials in Tray

Sterile vials in a tray ideal for large production runs using traditional infeed equipment, or for situations where full removal of the vials is required for manual filling.

SCHOTT adaptiQ® Vials in Clip Nest

Featuring a nest with clips holding each sterile vial securely by the body, clip nest packaging is compatible with fully-nested aseptic, automated processing, and is also suitable for freeze drying in the nest.
