

Our partners

Altrimex has exclusive arrangements with over 25 renowned packaging line suppliers. The major link between these companies is that they are all leaders in technology, have extensive R&D capacities, and have a clear corporate philosophy. We have initiated and built up long-term, intensive relationships and partnerships with these companies. This has resulted in an enormous think-tank in which developments, innovations and customer-specific demands are discussed and dealt with on a daily basis.

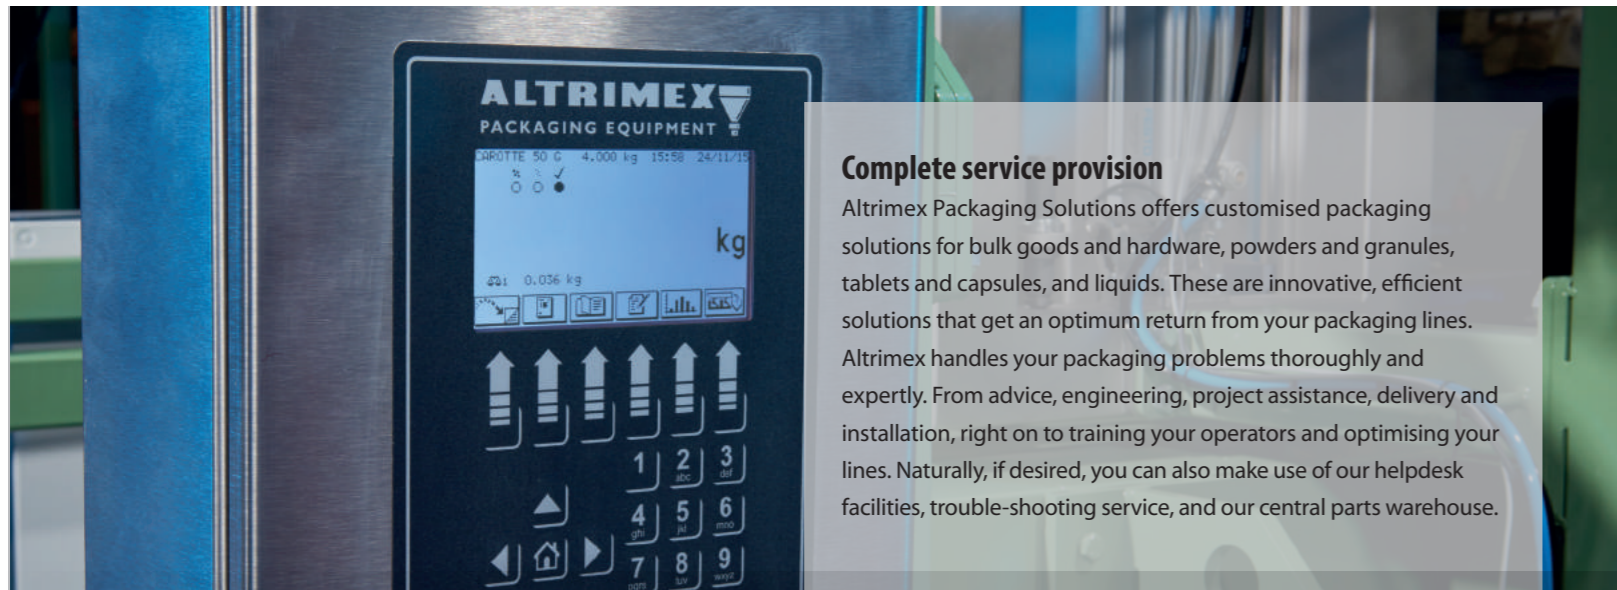

Rock-solid packaging lines

Complete service provision

Altrimex Packaging Solutions offers customised packaging solutions for bulk goods and hardware, powders and granules, tablets and capsules, and liquids. These are innovative, efficient solutions that get an optimum return from your packaging lines. Altrimex handles your packaging problems thoroughly and expertly. From advice, engineering, project assistance, delivery and installation, right on to training your operators and optimising your lines. Naturally, if desired, you can also make use of our helpdesk facilities, trouble-shooting service, and our central parts warehouse.

Hardware industry specialist

Since its foundation in 1973, Altrimex has specialised in packaging solutions for the hardware industry and the evidence is unmistakable. The machines are incredibly durable, practically maintenance-free, and easy to set. We use high-quality, European parts that comply with all certification standards. The systems are characterised by their modular build. What does this mean specifically? Growth, guaranteed. For example, a standalone linear weigher can be expanded with an electric alignment magnet and an automatic cartoning machine so that a fully automated packaging line is created. Investing in an Altrimex system is a responsible investment in the future.

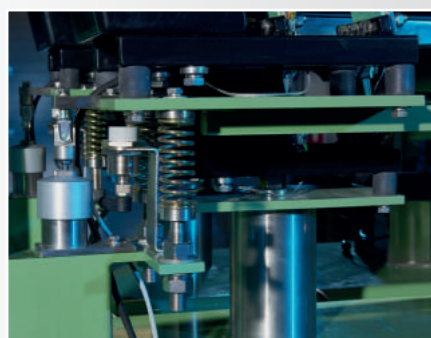

Range of possibilities

The range of Altrimex linear weighers offers as standard a broad spectrum of to-be-packaged weights – from 10 g to 50 kg – and can process lengths up to 230 mm. Altrimex also offers customised solutions for non-standard dimensions and weights. The machines used for this are incredibly accurate, partly thanks to the advanced operating system that can be linked to the network.

	Single tray	S5	S10	S15	S25
Weight range	2 – 25 kg 5 – 50 kg	10 – 100 gr 0.5 – 5 kg	50 – 500 gr 0.5 – 5 kg	0.25 – 2.5 kg 0.75 – 7.5 kg	5 – 25 kg
Max. screw length	150 mm	40 mm	85 mm	125 mm	200 mm
Max. bolt size	M24 x 150	M12 x 50	M12 x 100	M12 x 150 M16 x 100	M24 x 230
Max. nut size	M24	M12	M12	M16	M24
Max. nail length	150 mm	50 mm	100 mm	150 mm	200 mm

Fast and accurate

When you want high packaging speeds, Altrimex can deliver an advanced, incredibly accurate, multihead weighing system. Altrimex assists throughout the entire process using a thorough, turnkey approach so that you can be certain that everything has been taken care of down to the smallest detail.
