ABOUT US

We complete the package

We combine best-in-class packaging, high performance machinery and systems along with a partnership approach to offer you a complete packaging solution.

From our beginnings in 1984, our organisation has grown dramatically, as have our services and areas of expertise. The cornerstone of our success has been our partnership approach with our customers. We're collaborative and responsive, constantly refining our packaging solutions and offerings.

We strive to keep ahead of each new challenge our customers present to us, while always seeking to provide added value to their businesses.

Our experts can transform your packaging by creating bespoke designs, packaging solutions and systems that improve efficiency, allow you to become more sustainable, and help your business save costs and maximise profits.

Why partner with us?

A customer-facing team like no other

Whatever your packaging challenges or machinery requirements, the NPP team have the knowledge and expertise to ensure you get the optimum solution and best-in-class service. Plus, there's the peace of mind that comes from working with a company who've been doing this successfully for many years. Bottom line: we're specialists in our field, so rest assured, your packaging is in good hands.

Always going further

From innovations in packaging machinery to increasing the range of materials we supply, we're always seeking ways to improve our customer offering. Now more than ever, we understand the importance of using recyclable materials, along with implementing ways of reducing packaging waste.

Quality as a given

At NPP across all our operations and customer relationships, a commitment to quality is central to everything we do. We're continually reviewing and improving our systems and procedures, because we know that our quality promise is essential to our growth, and in turn positively impacts our customers' businesses.

QUALITY

Complete peace of mind

We strive to consistently deliver quality products and best-in-class service. From the materials we source, to the machinery we supply and service, to our working relationships with our customers. Quality is inbuilt in everything we do, and we wouldn't have it any other way.

We are proud of the fact that the systems and procedures developed for our operations consistently meet or exceed the exceptional standards of our valued customers. We continually review and improve these systems and procedures in accordance with our Quality Management Policy.

Sustainability

At NPP, we are committed to reducing the impact of our activities on the environment and assisting our customers in their efforts to address their sustainability concerns.

A small change in materials often can have a significant impact on the environment. By assessing your packaging materials and processes, we may be able to offer recommendations that will reduce environmental impact whilst maintaining or improving product performance.

We are committed to helping you to:

Use the minimum amount of packaging material possible to reduce waste

Deploy the most efficient packaging products available

Use packaging that is recyclable or made from recycled material

Packaging machinery

Innovation from in line to end of line

At NPP our range of packaging materials is only part of our customer offering. We also offer innovative machinery and automation systems designed to improve the efficiency and performance of your packaging process.

Whether that's machines for inline packaging i.e. shrink wrapping, vacuum packing, flow wrapping and sleeving systems, together with machines for end of line packing i.e. pallet-wrapping, case handling and robots. We'll advise on the equipment that will help transform your packaging operations. And just as importantly, we're here to service and maintain those machines when needed.

SOLUTIONS FOR INDUSTRY

Multi-sector solutions that evolve with you

Over the past four decades, NPP has become the trusted packaging partner of leading brands in Ireland and abroad. We've earned our customers' trust and confidence, and in turn we continue to deliver innovative solutions, quality packaging and machinery along with best-in-class service.

The breadth of our expertise spans all sectors of industry including; Food, Agriculture, Industrial, Pharmaceutical and Medical Device. But we're not done yet. We continue to move forward, strengthening and diversifying the NPP offering while embracing the future of sustainability.

Food

Protect your product and showcase your brand

We offer advanced packaging materials and machinery to food producers and processors. We understand they need systems that ensure the integrity and safety of their products, increases brand visibility while also maintaining freshness and shelf-life. With extensive experience in the food sector, NPP has the complete package to help you succeed.

Drinks

Maximum standout on a crowded shelf

For the highly competitive drinks market, we deliver packaging solutions that combine functional performance and superior aesthetics. Our range includes printed shrink film for bottled and canned beverages that delivers unmatched clarity and gloss, as well as corrugated cardboard packaging to ensure the integrity of individual bottles, often preferred by our distillery customers. We can also supply a range of industry-specific equipment, such as shrink-wrapping and flow-wrapping machinery.

Agriculture

Reliable, High-Performance Packaging

When it comes to providing packaging solutions for the animal feed and fertiliser industry, we know that our customers' priority is reliability, performance and continuity of supply. With extensive experience in the agri sector, we can provide that reassurance. Our range of materials include FFS films, animal feed sacks, valve sacks and FIBCs, and we also supply our agri customers with end of line machinery.

Pharma & Medical Device

Secure packaging for critical products

In the highly-regulated pharmaceutical and medical device sectors, packaging plays a crucial role. At NPP all our packaging solutions are manufactured with strict adherence to procedures that meet regulatory compliance. We supply to some of the largest pharmaceutical and medical device companies worldwide. Our expertise covers cleanroom and anti-static packaging, along with validated machinery, specifically for use in this sector.

Industrial

Materials, machinery and everything in between

For our customers in the construction, fuel and chemical industries, our focus is around durability and high performance. Our range includes FIBCs, heavy duty sacks and pallet-wrapping products, with recyclable options where possible. We also supply machinery and tooling, plus tapes and strapping to ensure optimum protection. For all your industrial products, we've got an end-to-end packaging solution.

OUR SERVICE

Specialists with service at our core

All our equipment is supplied and supported by an in-house team of machinery experts and engineers. Whenever you need spare parts, on-site technical assistance, training or preventive maintenance, our team are on hand to offer ongoing support.

We work with leading suppliers of packaging machinery and equipment such as Lantech, EFFE, Minipack, Audion and Signode to bring our customers effective and reliable solutions. Known for their commitment to quality, innovation, and integrity, our supply partners help us deliver complete packaging systems and best-in-class service to our customers.

Service & Parts

To support our comprehensive range of products we offer service and repair on all tooling and machinery supplied. We have an in-house repair and testing facility to aid in the inspection and repair of machinery as required. We also offer onsite repairs and breakdown service.

We stock an extensive range of spare parts in house because we know that when a machine is down, time is of the essence. Our long standing partnerships with suppliers also guarantees a quick turnaround time for non-standard parts that are required for breakdowns in the field.

Service & Maintenance Contracts

We offer priority cover for breakdowns through our service contract packages, which are available on all machinery we support in both the Irish and UK markets. We'll develop a bespoke service agreement and maintenance schedule to suit your machinery and operations.

Calibration and Validation Services

We are fully accredited by Audion to perform Validation services (also known as IQ/OQ or IOQ) and are the first organisation in Europe to receive such accreditation. We offer these services in conjunction with our Audion product line, lending support to the validation of medical or pharmaceutical grade pouches and films.

We also offer calibration services for Audion equipment and would be delighted to discuss and advise on any requirements.

Design & Application support

Our design and automation services give us the ability to create packaging systems that match your production and meet your demands for speed, accuracy, and performance. Our in-house engineers create CAD installation designs of your packaging line and will manage the project from start to finish.

Our ultimate goal is the success of your packaging line, whether that's improved efficiency, increased throughput, cost savings or all of above.

Packaging Audits

We offer on-site packaging audits, where all aspects of your packaging process are analysed. This in turn can potentially uncover inefficiencies and areas of improvement that can have a significant impact on your business productivity (and potentially reduce costs too).

Whether you want to optimise the performance of your packaging or switch to more sustainable packaging materials: we can advise you from the initial idea to the finished product.

Corrugated Design & Manufacture

Our in house designers will be able to advise on the best corrugated packaging solution for your specific application. We develop innovative designs using the latest Artios CAD software to suit your brief, budget and performance criteria. Our advanced Digital Cutting Table means we can produce high quality samples of corrugated products in house and with swift turnaround times. Every product we supply is manufactured in our state of the art manufacturing facility in Dublin.

If you are looking for a reliable source of standard boxes, we've got you covered there, too.

Let's work together

Let's work together to find creative solutions to help your organisation succeed today, tomorrow, and into the future.
