# WHAT ARE SHRINK SLEEVES AND WHY SHOULD YOU USE THEM?

Shrink sleeves, also known as full body sleeves, tamper bands or shrink bands, act as a secondary seal around your bottle or container to prevent contamination and tampering.

They provide visual tamper evidence to the end consumer, reducing shelf reject rates & enhancing your brand integrity.

Shrink sleeves are flexible, meaning they can shrink onto even the most uniquely shaped containers allowing you to stand out from the competition.

In many industries a shrink sleeve or tamper sleeve is a regulatory requirement and is needed to launch the product.

For example some primary closures such as GPI caps, bartops and corks are not tamper evident on their own and it's a requirement to have a secondary seal in order to protect the product integrity.

Our unique, plastic-free shrink sleeves are made from sustainable wood pulp. They are biodegradable and home compostable making them an eco-friendly packaging solution.

## BENEFITS OF USING OUR PLASTIC-FREE SHRINK SLEEVES:

- ✓ Plastic-free, biodegradable & home compostable
- ✓ Heat-free - the sleeves self-shrink at room temperature within an hour, perfect for heat sensitive contents or to reduce your energy consumption
- ✓ Hand applied - no investment needed for bulky, heavy, or expensive equipment, just pop them over your container and leave to self-shrink
- ✓ Perfect solution for awkward shaped containers
- ✓ Low MOQs starting from 1,000 sleeves
- ✓ Prevent counterfeiting & tampering & provide visual tamper evidence
- ✓ Complimentary technical advice & review of your container
- ✓ Free samples for trial
